

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20535

Docket

June 11, 1981

Docket No. 50-206
LS05-81-06-033

Mr. R. Dietch
Vice President
Nuclear Engineering and Operations
Southern California Edison Company
2244 Walnut Grove Avenue
Post Office Box 800
Rosemead, California 91770

Dear Mr. Dietch:

The Commission has issued the enclosed Amendment No. 56 to Provisional Operating License No. DPR-13 for the San Onofre Nuclear Generating Station (SONGS), Unit 1. The amendment consists of changes to the Technical Specifications in response to your requests dated October 20, 1978, (Proposed Change No. 76), March 31, 1980 (Proposed Change No. 89), April 4, 1980 (Proposed Change No. 91), June 30, 1980 (Proposed Change No. 93), and December 1, 1980 (Proposed Change No. 96). These requests are supported by information transmitted by your letters dated December 19, 1979, January 9, February 14, and May 16, 1980, in addition to an undated letter received by us on October 9, 1980.

The amendment revises the Appendix A Technical Specifications and Bases to reflect: (1) revised requirements for the service test of an uninterruptible power supply battery; (2) revised requirements relating to the Control Rod Position Indication System; (3) revised surveillance for the Offsite Power System; (4) revision of the definition of the term "Operable" to make it consistent with the Standard Technical Specifications; and (5) addition of the definition of modes of operation to conform closely to the Standard Technical Specifications.

The portions of your application requesting Technical Specification changes for decay heat removal and most of the changes for Specification 4.4, Emergency Power System Periodic Testing remain under review.

The Technical Specification changes for Proposed Change No. 89 are to be implemented within 60 days after the date of issuance of this amendment, according to your request, to allow you to gather and incorporate data during plant restart. The Technical Specification pages associated with Proposed Change No. 89 are identified on the first page of the attachment to the license amendment.

Some

During our review of Proposed Change No. 91 we found it necessary to modify your application with respect to the switchyard configuration. We discussed this change with your representative and mutually agreed upon them before issuing license Amendment No. 52 dated February 6, 1981. The inadvertent omission of the change to Specification 4.4.A was also discussed with your staff and the corrections were discussed and mutually agreed upon.

Copies of our related Safety Evaluation and the Notice of Issuance are also enclosed.

Sincerely,

Dennis M. Crutchfield, Chief
Operating Reactors Branch #5
Division of Licensing
