Docket Nos. 50-206, 50-361, 50-362

Southern California Edison Company
Irvine Operations Center
23 Parker Street
Irvine, California 92718

Attention: Mr. Harold B. Ray, Senior Vice President, Nuclear

Gentleman:

Subject: Final Systematic Assessment of Licensee Performance (SALP) Report
and Management Meeting Report

This refers to the NRC's Initial SALP Board Report No. 50-206/361/362/91-16, which was transmitted to you by our letter dated October 3, 1991. During our management meeting held with you and members of your staff at the San Onofre site on October 16, 1991, we discussed the results of that assessment. A copy of the agenda for that meeting is enclosed. Subjects discussed during the meeting are summarized in the enclosed meeting report. In summary, the meeting focused on the October 3, 1991, San Onofre Systematic Assessment of Licensee Performance (SALP) report and several recent emergent issues.

As discussed in our October 3, 1991 letter, in the initial SALP report transmitted by that letter, and during our October 16 meeting, the SALP Board found your overall performance to be good, in some cases superior, and clearly directed toward safe facility operation. During our meeting you identified areas to which you plan to give continuing management attention in order to realize long term, high quality performance in all of the functional areas. We strongly support these ongoing improvement initiatives.

No response to this letter is required. Further, we note you stated that a written response would not be submitted, and that you made no comments in our meeting which indicated a need for revision of the SALP report. Therefore, the SALP report as issued on October 3, 1991, is considered to be the Final SALP report for San Onofre.

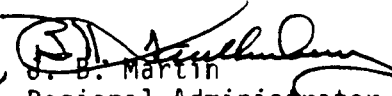

In accordance with 10 CFR 2.790(a), a copy of this letter and the enclosure will be placed in the NRC Public Document Room.
