APR 30 1993

Southern California Edison Company  
Irvine Operations Center  
23 Parker Street  
Irvine, California 92718

Attention: Mr. Harold B. Ray, Senior Vice President, Nuclear

SUBJECT: NRC INSPECTION REPORT NOS. 50-206, 361, 362/93-05

This refers to the routine inspection conducted by Messrs. C. W. Caldwell and D. L. Solorio of this office, and T. A. Greene, of the Office of Nuclear Reactor Regulation, on February 17 through March 31, 1993, of activities authorized by NRC License Nos. DPR-13, NPF-10 and NPF-15 and to the discussion of our findings held by the inspectors with Mr. R. W. Krieger and other members of the Southern California Edison staff at the conclusion of the inspection.

Areas examined during this inspection are described in the enclosed inspection report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspectors.

No violations of NRC requirements were identified within the scope of this inspection. However, we did note that your QA organization identified that several commitments made in Licensee Event Report 2-91-007 regarding reactor coolant pump baffle repairs were not implemented. We are concerned about the accuracy of this report. We acknowledge that your quality assurance organization independently identified the deviations and that you are currently conducting an investigation to address this concern. We will review this issue to determine the reason for these deviations in a future inspection after you have completed your investigation.

In accordance with 10 CFR 2.790(a), a copy of this letter and the enclosure will be placed in the NRC Public Document Room.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

C. VanDenburgh, Chief  
Reactor Projects Branch
