JUL 14 1993

Docket Nos. 50-206, 50-361, 50-362

Southern California Edison Company
Irvine Operations Center
23 Parker Street
Irvine, California 92718

Attention: Mr. Harold B. Ray, Senior Vice President, Power Systems

SUBJECT: NRC MEETING REPORT NOS. 50-206/361/362/93-20

This refers to the meeting held with Southern California Edison Company (SCE) at the Region V office on July 1, 1993. The purpose of the meeting was to discuss your staff's assessment of the ongoing Unit 3 steam generator primary to secondary leak and SCE's plans for Unit 2 steam generator eddy current inspections. The details of the meeting are described in the enclosed Meeting Report.

We appreciate the efforts of your staff in providing information related to activities at San Onofre. In particular, it appears that your staff have stayed abreast of developments related to steam generator tube problems at Palo Verde, and they have modified the San Onofre Unit 2 steam generator eddy current inspection plan as a result of Palo Verde's experience. We encourage close communications between SCE and the NRC should you observe any steam generator tube problems in Unit 2.

In accordance with 10 CFR Part 2.790 of the NRC's "Rules of Practice," a copy of this letter and the enclosures will be placed in the NRC Public Document Room.

Should you have any questions concerning this meeting, we will be glad to discuss them with you.

Sincerely,

K. E. Perkins, Jr., Director
Division of Reactor Safety and
Projects
