U.S. Nuclear Regulatory Commission  
Attention: Document Control Desk  
Washington, D.C. 20555-0001

**Subject:** Notification of Readiness for Inspection of Traditional Enforcement Violations  
Trend  
Cooper Nuclear Station, Docket No. 50-298, DPR-46

**Reference:** Letter from Jessie Quichocho, U.S. Nuclear Regulatory Commission, to Oscar A. Limpas, Nebraska Public Power District, dated September 3, 2013, "Mid-cycle Assessment Letter for Cooper Nuclear Station"

Dear Sir or Madam:

The purpose of this letter is for Nebraska Public Power District (NPPD) to notify the Nuclear Regulatory Commission (NRC) of NPPD's readiness for the NRC to perform an inspection of the trend of Severity Level IV traditional enforcement violations issued for Cooper Nuclear Station.

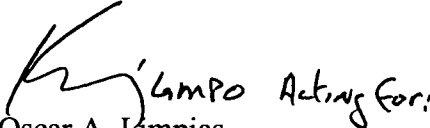

In the Reference, it is stated that the NRC issued three Severity Level IV traditional enforcement violations during the time period of July 1, 2012, to June 30, 2013. As a result of those violations, the NRC would conduct Inspection Procedure 92723, "Follow Up Inspection for Three or More Severity Level IV Traditional Enforcement Violations in the Same Area in a 12-Month Period" after NPPD notified the NRC of its readiness for inspection.

NPPD has taken action to address the violations. As such, NPPD considers this trend in traditional enforcement violations ready for inspection.

This letter contains no regulatory commitments.

If you have any questions concerning this matter, please contact David W. Van Der Kamp, Licensing Manager, at (402) 825-2904.

Sincerely,

  
Oscar A. Limpas  
Vice President-Nuclear and  
Chief Nuclear Officer
