

Docket No. 50-206

MAY 28 1991

Mr. Harold B. Ray  
Senior Vice President  
Southern California Edison Company  
23 Parker Street  
Irvine, California 92718

Dear Mr. Ray:

SUBJECT: NRC BULLETIN 88-04, POTENTIAL SAFETY-RELATED PUMP LOSS, SAN ONOFRE  
NUCLEAR GENERATING STATION, UNIT 1 (TAC No. 69967)

By letter dated March 1, 1991, you provided a revised response to NRC Bulletin 88-04, "Potential Safety-Related Pump Loss," for San Onofre Nuclear Generating Station, Unit 1. Your response confirmed that all long-term actions associated with the issues identified in the bulletin, including a modification to increase the main feedwater pump minimum flow rate in the safety injection mode, have been completed. The NRC staff also notes that your engineering evaluations for the actions taken have been documented and that this documentation will be permanently maintained.

Accordingly, your response has addressed the issues in the bulletin and we are closing the subject TAC. Further NRC review, if any, will be by future audit or inspection.

Sincerely,

ORIGINAL SIGNED BY

John O. Bradfute, Project Engineer  
Project Directorate V  
Division of Reactor Projects III/IV/V  
Office of Nuclear Reactor Regulation
