Attention: Document Control Desk  
Washington, D.C. 20555

Gentlemen:

Subject: Docket No. 50-206  
Amendment Application No. 164  
San Onofre Nuclear Generating Station  
Unit 1

Enclosed is Amendment Application No. 164 to the Provisional Operating License DPR-13. Amendment Application No. 164 consists of Proposed Change No. 204, which is a request to revise Appendix A, Technical Specifications, of Provisional Operating License DPR-13.

Proposed Change No. 204 is a request to revise Appendix A Technical Specifications 2.1, "REACTOR CORE - Limiting Combination of Power, Pressure, and Temperature," 3.5.2, "Control Group Insertion Limits," 3.11, "Continuous Power Distribution Monitoring," 3.3.3, "Refueling Water Storage Tank," 4.1.1, "Operational Safety Items" and 4.2.1, "Safety Injection and Containment Spray System Periodic Testing." to allow San Onofre Unit 1 to be operated as described in the forthcoming report, "Reload Safety Evaluation, San Onofre Nuclear Generating Station, Unit 1, Cycle 10."

The technical specification changes identified above represent the expected scope of specifications impacted by the Reload Safety Evaluation for Cycle 10 which is currently underway. Additional information in support of Proposed Change No. 204, as well as the actual values and setpoints, will be provided as soon as they are available as supplements to this amendment application. Consistent with our discussion with NRC staff this Reload Safety Evaluation is being performed to support plant operation on the reduced Tavg program with up to 20% steam generator tube plugging and expeditious NRC review and approval of Proposed Change 204 is required to facilitate timely restart of San Onofre Unit 1 from its current refueling outage. Restart is currently scheduled for February 20, 1989.
