

BEFORE THE UNITED STATES NUCLEAR REGULATORY COMMISSION

Application of SOUTHERN CALIFORNIA EDISON)
COMPANY and SAN DIEGO GAS & ELECTRIC COMPANY) DOCKET NO. 50-206
for a Class 104(b) License to Acquire,)
Possess, and Use a Utilization Facility as) Amendment No. 174
Part of Unit No. 1 of the San Onofre Nuclear)
Generating Station)

SOUTHERN CALIFORNIA EDISON COMPANY and SAN DIEGO GAS & ELECTRIC COMPANY,
pursuant to 10 CFR 50.90, hereby submit Amendment Application No. 174.

This amendment consists of Proposed Change No. 215 to Provisional Operating License No. DPR-13. Proposed Change No. 215 modifies the License Condition incorporated in Provisional Operating License No. DPR-13 as Section 3.

Proposed Change No. 215 is a request to revise License Condition 3.N to reflect the change in; 1) the schedule for implementation of all the requirements of Item II.F.2 of Generic Letter 82-28, "Inadequate Core Cooling (ICC) Instrumentation System," and 2) the schedule to submit specific plans for implementation of ICC Instrumentation System for NRC approval. This proposed change represents a delay in completion of required actions of approximately 12 months, as compared to existing requirements. They permit the Cycle 11 refueling to be combined with a thermal shield repair outage and avoid the necessity for a separate refueling outage.

In the event of conflict, the information in Amendment Application No. 174 supersedes the information previously submitted.

Based on the significant hazards analysis provided in the Description and Significant Hazards Consideration Analysis of Proposed Change No. 215, it is concluded that (1) the proposed change does not involve a significant hazards consideration as defined in 10 CFR 50.92, and (2) there is reasonable assurance that the health and safety of the public will not be endangered by the proposed change.

Subscribed on this 2nd day of November, 1989.

Respectfully submitted,
SOUTHERN CALIFORNIA EDISON COMPANY

By: Harold B. Ray
