

March 30, 1984

Docket No. 50-206
LS05-84-03-038

LICENSEE: SOUTHERN CALIFORNIA EDISON COMPANY

FACILITY: San Onofre Nuclear Generating Station, Unit 1

SUBJECT: SUMMARY OF MARCH 28, 1984 TO DISCUSS LICENSING ACTIVITIES
FOR SAN ONOFRE UNIT 1 INCLUDING LICENSEE'S PROPOSAL FOR
AN INTEGRATED LIVING SCHEDULE (ILS)

On March 28, 1984 representatives of Southern California Edison Company (the licensee) and members of the NRC staff met in Bethesda, MD. Enclosed is a list of attendees. The purpose of the meeting was to discuss licensing activities for San Onofre 1, and in particular the licensee's proposal for an integrated living schedule (ILS).

The staff and licensee discussed the major licensing tasks to be accomplished in 1984 such as the SEP integrated assessment, the plant restart safety evaluation, exemption requests, and their relationship to the integrated living schedule. The licensee and staff plan to meet periodically over the next several months to check on the progress of these reviews.

In April, the licensee will submit a proposal for a dedicated shutdown system for fire protection as well as a request to defer implementation of the post-accident sampling system. In June, the licensee will submit a request for exemption on environmental qualification.

The licensee agreed to establish milestones for submittal of the other information relating to SEP, the ILS and restart to facilitate staff scheduling of review.
