By letter dated August 6, 2013 (Agencywide Documents Access and Management System Accession No. ML13224A247), Dominion Generation, submitted Dominion's Physical Security Plan (PSP), Training and Qualification Plan and Safeguards Contingency Plan, Revision 15 for the Millstone Power Station. The NRC staff has determined that the additional information requested below is needed to complete its review.

1. The NRC staff request clarification of the cameras depicted on Figure 11, Revision 3 of PSP, Revision 18. Describe the type of cameras (fixed or pan tilt zoom) and their purpose in the site's protective strategy.

Regulatory Basis: Consistent with 10 CFR 73.55 (c) Security plans. (1) Licensee security plans must describe: (i) How the licensee will implement requirements of this section through the establishment and maintenance of a security organization, the use of security equipment and technology, the training and qualification of security personnel, the implementation of predetermined response plans and strategies, and the protection of digital computer and communication systems and networks.
