General Comment

The NRC must stop listening to and giving in to the small group of vocal Anti-Nuclear activists that keep pushing the NRC around. The NRC must take the political heat that these people create knowing that they are indeed a small vocal minority.

They will go away if they are ignored. Hear then once, answer them and then ignor them.

This country needs Nuclear Power especially the the "New Technology" kind. The Green energy concepts that flourish and require tax subsidy will not produce the power we need. The tax subsidies must end. The US will need increasingly more power especially if the electric cars catch on. Electric cars with out Nuclear power bad for the enviroment.

San Onofre needs to be rebuilt with new technology reactors that use the spent fuel from the old reactors. After all the electric generators and infrastructure are all there.

The NRC must move faster even at the expense of political correctness. Let engineers make the decisions instead of polititions and activists.
