Subject: Comment on Draft NUREG-2157 -- Docket NRC 210-0246 Waste Confidence Generic Environmental Impact Statement

Dear Secretary,

While the media isn't talking about it, we know what's really happening after Fukushima. Radioactive waste has made it to the West Coast of the U.S.

How can we not learn from this? Your children and grandchildren have to live here after we're gone. Make it safe for all of them.

Ending radioactive waste generation is the single most important step we can take to minimize the risks surrounding its storage, and the NRC should revise its Waste "Confidence" document to ensure the speediest possible end to that generation. In the interim, NRC must mandate the immediate movement of waste that has been sufficiently cooled out of the pools to dry storage containers, and those should be hardened on-site (HOSS) to improve safety and security.

Ginger Mira
