Subject: Comment on Draft NUREG-2157 -- Docket NRC 210-0246 Waste Confidence Generic Environmental Impact Statement

Dear Secretary,

The NRC's "waste confidence" principle was properly struck down by a federal court because, some 60 years into the commercial atomic age, it is patently obvious that there is no foreseeable "solution" for long-term radioactive waste storage that would attain three necessary and basic goals: scientifically-defensible, environmentally-responsible and publicly-acceptable.

Not only is there no long-term solution for atomic waste in hand or on the horizon, the shorter-term programs now in place are inadequate from a public safety standpoint, and do not offer the requisite confidence to allow continued generation of radioactive waste.

Truett Bobo
