To Nuclear Regulatory Commission:

I am a 71-year-old Minnesotan who is becoming more appalled every day that our upcoming children & grandchildren are being asked to pay the price for nuclear waste gone crazy. In all these decades, it has become more clear each day that there IS NO SAFE solution to the problem of 'STORING' nuclear waste!

YOU -- NRC -- are charged with protecting the public. Please be HONEST & FORTHRIGHT & admit there is no safe way to continue to operate nuclear power plants. Fukushima has given us "the writing on the wall"; nuclear mishaps are POISONING our delicate globe & all of the living creatures on it!

At the very least, I beg you to keep the present moratorium on nuclear licensing in place & then, be ethical enough to give a deep & thorough review to the up-to-this-date-impossible-to-solve problem of disposing of nuclear waste. And when the true facts are in, we will mostly likely need to muster the courage to close down the existing nuclear plants across this country which have come into old age & have become more unsafe than ever.

The human race may not explode itself with a man-made bomb (as we worried about when I was a kid in the 50's) but instead, we are likely setting ourselves up for a slow & steady death by escaped radiation. We, the people of the entire planet, are COUNTING ON YOU TO KEEP US SAFE; there is no one else who has as much authority to do so as you do.

Thanking you in the hopes that you will heed my plea for CAUTION & SAFETY!

Regards,
Jan Greenfield
St. Paul, MN
