Rathdrum, Idaho 83858

SUBJECT: TERMINATION OF NRC RADIOACTIVE MATERIALS LICENSE NO. 11-27449-01

By letter dated November 18, 2013, you informed the Nuclear Regulatory Commission (NRC) that you wished to terminate NRC radioactive materials license number 11-27449-01 issued to Interstate Concrete and Asphalt Company. The NRC Form 314 dated November 18, 2013, stated that all activities authorized by this license have ceased, and all radioactive material possessed by the licensee under this license have been transferred to two licensed entities for further use.

The NRC staff has reviewed the supporting documentation to your NRC Form 314. Leak test performed on the sealed sources were negative for removable contamination. Based on the documentation submitted and a review of your historical file, the staff concluded that all licensable radioactive material has been removed from your facilities. Your facilities located at 8849 W. Wyoming Road, Rathdrum, Idaho; 15225 N. Vernon J. Baker Boulevard, Hayden, Idaho; and 1000 Baldy Mountain Road, Sandpoint, Idaho, are suitable for unrestricted use in accordance with 10 CFR 20.1402, "Radiological Criteria for Unrestricted Use." Based on these conclusions, no further remediation or actions with respect to NRC regulated material is required.

Please find enclosed Amendment No. 06 to License No. 11-27449-01 authorizing your license termination. An environmental assessment for this action is not required since this action is categorically excluded under 10 CFR 51.22(c)(20)(i).

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Interstate Concrete and  
Asphalt Company
