Secretary
U.S. Nuclear Regulatory Commission
Washington, DC 20555-0001

I am writing in support of energy, electricity and most of all indoor bathrooms. I support the NRC's Spent Fuel Storage Rule. The NRC oversight of PG&E has a very detailed and successful spent fuel management program and continues to safely store fuel via both its wet and dry cask storage systems. With all the safeguards in place to effectively manage and monitor the stored spent fuel I am confident they will continue to do so. It is however, the Department of Energy's responsibility to make good on its commitment to receive and safely store the spent fuel for the long term. Locally stored spent fuel could be safely removed to a single or regional locations controlled by and protected by our national government. Thank you for your consideration.
