Secretary, Nuclear Regulatory Commission  
Washington DC 20555-0001 ATTN: Rulemakings and Adjudications Staff

Friends:

I have visited Diablo Nuclear Power Plant two times. We have also worked in Guatemala after the 1976 earthquake and seen railroad tracks twisted into S shaped curves. In Forest Falls, California, we have seen the enormous boulder that, after an earthquake, had bounced down the mountain to stop a few feet from a friend's home.

Please arrange to have used fuel pools at Diablo transferred as soon as possible to hard storage. Many years ago, before there were tight restrictions, I have flown over Diablo; open storage pools would be fairly easy for a suicide bomber to destroy. I am convinced a severe earthquake could create leakage.

Even the hard casks should be transferred as soon as possible because of the possibility a very severe quake would tumble several down toward the plant and toward the ocean.

I am writing out of concern for the many, many students I taught in the school district downwind from Diablo.

Please do not renew the license for Diablo because of the inherent dangers, and please help make arrangements to close Diablo as soon as possible.

Sincerely,

Susan N. Atlee
