Subject: Comment on Draft NUREG-2157 -- Docket NRC 210-0246 Waste Confidence Generic Environmental Impact Statement

Dear Secretary,

Nothing in the NRC's Draft NUREG-2157 changes our public safety risk realities. By their very nature, neither casks nor fuel pools are designed for permanent storage. Low probability is not a substitute for protection, as the world already has learned from Fukushima to Chernobyl to Bhopal and Love Canal.

The NRC should revise its Waste "Confidence" document to ensure the speediest possible end to waste generation. In the interim, NRC must mandate the immediate movement of waste that has been sufficiently cooled out of the pools to dry storage containers, and those should be hardened on-site (HOSS) to improve safety and security.

Jody Smith

CA
