## REGULATORY GUIDE 10.1

### COMPILATION OF REPORTING REQUIREMENTS FOR PERSONS SUBJECT TO NRC REGULATIONS

#### A. INTRODUCTION

The Commission's regulations set forth in Title 10, Code of Federal Regulations, require the submission of various reports in connection with licensed activities. In addition, the Commission regulations require that each applicant for a license authorizing operation of a production or utilization facility include in the application proposed technical specifications. These technical specifications as approved by the NRC are incorporated into the facility license as conditions of the license and include a section on reporting requirements. This guide presents a compilation of all reporting requirements applicable to the various types of NRC licensees and other persons subject to NRC regulations, including identification of the proper NRC addressee or addressees and designation of the number of copies required.

#### B. DISCUSSION

For the most part, neither the NRC's regulations nor the technical specifications of a facility license specify the number of copies of a report that should be submitted by a licensee to the Commission. In addition, although the regulations specify how a report should be addressed, e.g., the responsible NRC Office, the addressees will change periodically as a result of modifications in workload or functional realignments. Appendix A of this guide is a complete listing of all NRC reporting requirements in effect at the time of issuance and indicates the number of copies of reports that should be submitted in order to ensure timely review by the staff.

The second column of Appendix A titled "Type of Licensee" shows those types of licensees that are normally subject to the particular reporting requirement. Categories included are (1) Reactor Facility Licensees, (2) Fuel Fabrication and Fuel Reprocessing Plant

Licensees, (3) Byproduct Material Licensees, (4) Source Material Licensees, and (5) Other Special Nuclear Material Licensees. Because of the broad categorization of licensees listed in the "Type of Licensee" column and because other reporting requirements may be applicable in particular situations, this column should not be relied upon as definitive in all situations.

This guide does not discuss the specific information that is to be contained in the report; for this information the licensee should refer to the underlying regulation or provision of the license technical specifications. In some cases, the information that is to be submitted by licensees is described in detail in other publications in the Regulatory Guide series. For example, Regulatory Guide 1.16 deals with the reporting of operating information for nuclear power plants, and Regulatory Guide 3.19 deals with the reporting of operating information for fuel reprocessing plants.

As indicated in Appendix A, when a report is to be sent to both a primary recipient and secondary addressee, any cover letter should be addressed to the primary recipient and should show that copies are also being forwarded to the secondary addressee. There should be a cover letter for each copy of the report.

It is expected that this guide will be revised from time to time as the various reporting requirements are modified or as new requirements are added. For any new or revised reporting requirement not listed in the appendix and for which the appropriate number of copies is not specified in the regulations or technical specifications, a licensee should submit 20 copies of the report or as otherwise specified by the Commission.

#### USNRC REGULATORY GUIDES

Regulatory Guides are issued to describe and make available to the public methods acceptable to the NRC staff of implementing specific parts of the Commission's regulations, to delineate techniques used by the staff in evaluating specific problems or postulated accidents, or to provide guidance to applicants. Regulatory Guides are not substitutes for regulations, and compliance with them is not required. Methods and solutions different from those set out in the guides will be acceptable if they provide a basis for the findings requisite to the issuance or continuance of a permit or license by the Commission.

Comments and suggestions for improvements in these guides are encouraged at all times, and guides will be revised, as appropriate, to accommodate comments and to reflect new information or experience. This guide was revised as a result of substantive comments received from the public and additional staff review.

Comments should be sent to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Section.

The guides are issued in the following ten broad divisions:

- |                                   |                        |
|-----------------------------------|------------------------|
| 1. Power Reactors                 | 6. Products            |
| 2. Research and Test Reactors     | 7. Transportation      |
| 3. Fuels and Materials Facilities | 8. Occupational Health |
| 4. Environmental and Siting       | 9. Antitrust Review    |
| 5. Materials and Plant Protection | 10. General            |

Copies of published guides may be obtained by written request indicating the divisions desired to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Office of Standards Development.

### **C. REGULATORY POSITION**

The addressees and copy coverage shown in Appendix A are intended to implement the reporting requirements of Title 10 of the Code of Federal Regulations and those reporting requirements imposed by the NRC as license conditions. It is recognized that, in a number of cases, there is a conflict between the addressee shown in Appendix A and the addressee shown in the underlying regulation. For these situations, appropriate changes to the regulations are in the process of being developed.

### **D. IMPLEMENTATION**

The purpose of this section is to provide guidance to applicants and licensees regarding an implementation schedule for utilizing this guide.

The reports listed in the guide reflect regulatory or license requirements existing at the date of the guide.

Therefore, the indicated reporting requirements with respect to the number of copies and timing of the report should be followed for the next submittal of each report listed. Until appropriate changes are made in the regulations to conform to the addressee as shown in Appendix A, reports may continue to be submitted to the addressees shown in the applicable sections of the regulations.

Irrespective of transmittal mode or addressee, all reports submitted by licensees should reference:

1. The specific section of regulations under which the report is submitted, and
2. The governing docket or license identification number.

# APPENDIX A

## COMPILATION OF REPORTING REQUIREMENTS FOR PERSONS SUBJECT TO NRC REGULATIONS

No.	Type of Licensee*	Report	Requirement	Timing	Method	Primary Recipient	Secondary Addressee
1.	All	Report of radioactive contamination of package of radioactive material	§ 20.205(b)(2)	Immediately	P, T <sup>a</sup>	NRC Reg. Off. <sup>b</sup>	Final Delivering Carrier
2.	All	Report of excessive radiation levels external to the package	§ 20.205(c)(2)	Immediately	P, T	NRC Reg. Off.	Final Delivering Carrier
3.	All	Theft or loss of licensed material	§ 20.402(a)	Immediately	P, T	NRC Reg. Off.	None
4.	All	Theft or loss of licensed material	§ 20.402(b)	30 days	W <sup>c</sup>	NRC Reg. Off. (2) <sup>d</sup>	Dir., IE <sup>e</sup> (6); Dir., MIPC <sup>f</sup> (1)
5.	All	Report of Incident	§ 20.403(a)	Immediately	P, T	NRC Reg. Off.	Dir., MIPC (1)
6.	All	Report of incident	§ 20.403(b)	24 hours	P, T	NRC Reg. Off.	Dir., MIPC (1)
7.	All	Overexposure of individual and excessive levels and concentrations of radioactivity	§ 20.405(a)	30 days	W	NRC Reg. Off. (2)	Dir., IE (6); Exposed Individual (1); Dir., MIPC (1)
8.	A, B, C, E	Personnel exposure and monitoring reports	§ 20.407(b)	Annually	W	Dir., IE (1)	None
9.	A, B, C, E	Personnel exposure at termination of employment	§ 20.408	90 days after termination	W	Dir., IE (1)	Exposed Individual (1)

\*Code: A — Reactor facility licensees  
 B — Fuel fabrication and fuel reprocessing plant licensees  
 C — Byproduct material licensees  
 D — Source material licensees  
 E — Other special nuclear material licensees  
 All — All licensees

<sup>a</sup>P, T — Indicates that notification may be by phone, telegraph, mailgram, or facsimile.

<sup>b</sup>NRC Reg. Off. — Indicates appropriate NRC Regional Office specified in Appendix D of 10 CFR Part 20.

<sup>c</sup>W — Indicates written report.

<sup>d</sup>Number in parentheses following the primary recipient or the secondary addressee indicates the appropriate number of copies of the report that should be forwarded to each. Where notification is by phone, telegraph, mailgram, or facsimile, no copy distribution is indicated.

<sup>e</sup>Director, Office of Inspection and Enforcement, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555.

<sup>f</sup>Director, Office of Management Information and Program Control, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555.
