Subject: RE: NRC Guidance re Ore Buying Stations

Sarah -

I'm working on getting a copy of the ore buying station guidance into ADAMS. When it is available, I'll send along the accession number and a link to the document.

One other piece of historical guidance that may be useful is NUREG/CR-5569, "Health Physics Positions Data Base". Page 161 of this document discusses licensing for crushing of uranium ore. The document is available in ADAMS under Accession number ML093220108. This link should also take you to the document:

<http://pbadupws.nrc.gov/docs/ML0932/ML093220108.pdf>

Doug

Subject: NRC Guidance re Ore Buying Stations

Dear Mr. Mandeville,

In today's meeting between the NRC and Mineral Ablation, an NRC staff person referenced an old NRC guidance related to ore buying stations. I would like a copy of that guidance or a link to the guidance.

Thank you,

Sarah Fields
