Subject: Nuclear Regulatory Commission's "Waste Confidence" Rule

Subject: Docket ID NRC-2012-0246 Nuclear Regulatory Commission's "Waste Confidence" Rule

I find it very difficult to believe anyone can, in good conscience, state that we can safely continue to create nuclear energy at Diablo Nuclear Power Plant when there is no known safe way to dispose of such dangerous waste material. I wholeheartedly support the stand taken by Mother's for Peace members at the recent meeting in San Luis Obispo. I also, believe the person who recommended using the land for safer forms of sustainable energy, such as: wind machines, using the ocean for hydro power, etc. was on the right track.

We need to be moving away from dangerous nuclear power plants and their volatile waste material and using all of our creativity to provide clean, sustainable energy. Our country's focus needs to be on providing a safe, pollution free environment - helping to halt global warming as quickly as possible for the welfare of the peoples of our planet.

Thank you for your consideration.
