Mansfield, MA 02048  
Docket No.: 99901431  
Report No.: 2013-201  
"Reply to a Notice of Non-Conformance"

Dear Sirs:

We acknowledge receipt of your letter addressing the six non-conformances from our audit (9990143/2013-201-01 thru -06). We are currently working investigations and corrective measures concerning these non-conformances and recognize that our response was due by December 14, 2013.

In order to perform the necessary research to bring these issues to closure, I respectfully request an extension to respond by the close of business on December 27, 2013. All personnel essential to the complete closure of these issues will be available next week and focused on this as a number one priority.

Today, I spoke to Jonathan Ortega-Luciano from the Office of New Reactors and he has agreed to granting us an extension on our response until December 27, 2013.

Thank you for your understanding concerning this matter.

Sincerely,

A handwritten signature in cursive script that reads "Brian L. Martin".
