Subject: Waste Confidence Rulings

I am a citizen concerned about transport of nuclear waste via roads or railways, putting public safety, health and first response at risk. There is no safe place to store waste in the interim or long-term. I am perplexed at a plan to endanger more communities. Nuclear waste has already contaminated nuclear plant sites and effected surrounding areas. The best plan I have heard suggests leaving waste in place using hardened on - site storage placed in earth berms. Each site has differences, so a blanket/generic plan may seem a cost-saver upfront but prove disastrous later. Each site needs a specific plan. I am not a scientist but can grasp that we cannot take shortcuts with waste. I suggest continued study with experts, communities, agencies, legislators and all other stakeholders involved in transparent process to address the waste legacy that will plague generations.submitted by Bonnie Bluestein, 1932 N.
