Subject: REGARDING - Nuclear Waste and or Nuclear Waster Repository storage

Hello,

I am Joan Britz, a citizen of the US, a Mother, Grand Mother, Daughter, Sister and Cherokee Spiritual Adviser. I come asking you to hear my words today and think upon your own families. How would you feel to see your child drink water contaminated with nuclear waste? How would you feel to know you set a plate of food before your child and it was contaminated with nuclear waste but you had nothing else to feed them even though you know they will surely get sick and possibly die. I want each one of you to think about this because you are educated people. You have been informed of how "we can safely store nuclear waste" yet each one of you read the news or watch it then turn your head. You know of the thousands of animals dead from this waste, the high rise of cancers in the areas of storage wherein your "safe nuclear waste storage facility" leaked or the nuclear plant that failed caused so much death and destruction to all people and animals, and the land is no longer safe to even walk upon. You see we have reached a critical point....it IS in your back yard too now! It IS going to be your children dying! Just like the rest of the world, if you continue to allow production it IS going to effect you and all of the world. IT ALREADY HAS AND YOU HAVE SEEN THIS!

Now are you going to be part of the problem that continues or are you going to be part of the solution that says no more! We can no longer afford to utilize this Nuclear Waste and we certainly can not afford to store it because there is no man made container that can isolate and keep any isotope from doing harm. Since the containers will eventually leak there WILL BE MORE HARM and instead of continuing in such way I use my vote to find another better way! Each one of you have this option. How do you think your children would want you to vote?

Sincerely,

Joan Britz
