SUBJECT: TERMINATION OF NRC RADIOACTIVE MATERIALS LICENSE NO. 25-29209-01

By NRC Form 314 dated September 5, 2013, you informed the U.S. Nuclear Regulatory Commission (NRC) that the licensee wished to terminate NRC radioactive materials license number 25-29209-01. The NRC Form 314 stated that all activities authorized by this license have ceased, and all radioactive materials procured and/or possessed by the licensee under this license have been disposed by transfer to an authorized licensed entity.

The staff has reviewed the results of the final status survey submitted by you. This document demonstrated that no residual contamination above the screening value for tritium was detected in the three areas of use authorized in the license. Based on these results and a review of your historical file, the staff concluded that all licensable radioactive material has been removed from the facility. Your facility located at 2155 Analysis Drive (rooms 145, 201 and 202), Bozeman, Montana, is suitable for unrestricted use in accordance with 10 CFR 20.1402, "Radiological Criteria for Unrestricted Use." Based on these conclusions, no further remediation or actions with respect to NRC regulated material is required.

Please find enclosed Amendment No. 03 to License No. 25-29209-01 authorizing your license termination. An environmental assessment for this action is not required since this action is categorically excluded under 10 CFR 51.22(c)(20)(iii).

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

You can contact me at 817-200-1189 if you have questions or require clarification on any of the information stated above.

Sincerely,

/RA/

Roberto J. Torres, Senior Health Physicist  
Nuclear Materials Safety Branch B
