Mr. John Sauger, General Manager
Zion Restoration Project
101 Shiloh Boulevard
Zion, IL 60099

SUBJECT: ZION NUCLEAR POWER STATION (PERMANENTLY SHUTDOWN)
INDEPENDENT SPENT FUEL STORAGE INSTALLATION – NRC SECURITY
INSPECTION REPORT NOS. 05000295/2013405(DNMS),
05000304/2013405(DNMS) AND 07201037/2014401(DNMS)

Dear Mr. Sauger:

On December 19, 2013, the U.S. Nuclear Regulatory Commission (NRC) completed an initial security inspection of the physical security program for the Independent Spent Fuel Storage Installation (ISFSI) located near the Zion Nuclear Power Station (ZNPS), Zion, Illinois. The purpose of the inspection was to verify that the security program and protection for the ISFSI was in compliance with the NRC approved ISFSI Physical Security Plan (PSP), Safeguards Contingency Plan (SCP), Training and Qualification Plan (T&QP), NRC regulations with approved exemptions, and NRC Security Order EA-11-268 before fuel transfer to the ISFSI pad occurs. In addition, the inspection also evaluated the implementation of the Material Control and Accounting (MC&A) Program in accordance with Title 10 of the *Code of Federal Regulations* (CFR) 72.72; and the handling and storage of safeguards information. At the conclusion of the on-site inspection on December 19, 2013, the inspectors discussed the inspection findings with Mr. G. Bouchard and members of your security, licensing and ISFSI project management staff.

The inspection also examined activities conducted under your license as they relate to security and compliance with the NRC's rules and regulations and with the conditions of your license. The inspectors reviewed selected procedures and records, observed activities, and interviewed personnel. The enclosed inspection report documents the inspection results.

Based on the results of this inspection, no findings of significance were identified.

**Enclosure Contains Sensitive Unclassified
Non-Safeguards Information. When
separated from the enclosure, this
transmittal document is decontrolled.**

J. Sauger
