"If the costs of waste disposal are so great as to make it impossible to operate nuclear power plants cost-effectively, that fact must be recognized. Once the economic and environmental realities are acknowledged, it becomes possible to assess whether the "intractable" problem of storing ever-increasing quantities of spent nuclear fuel is best solved by not making any more in the first place. On the other hand, one only has to look at Fukushima to know what will happen if we keep on running our nuclear reactors until they break. Loss of lives. Loss of land. Loss of income. On the other hand, one only has to look at Fukushima to know what will happen if we keep on running our nuclear reactors until they break. Loss of lives. Loss of land. Loss of income. Lose/ lose."
