NRC DOCKET#: NRC-2012-0246

SECY DOCKET DATE: 12/20/13

TITLE: Waste Confidence—Continued Storage of Spent Nuclear Fuel

COMMENT#: 00699

From: Pamela Y Schimmelpfennig [<mailto:Pamela.Y.Schimmelpfennig@hti.htch.com>]

The NRC has not conducted a thorough environmental analysis of spent fuel storage and disposal issues, the costs and risks of storing spent fuel at reactor sites for decades, or even hundreds of years. They need to focus on securing the waste, NOT making more of it! We must evaluate phasing out nuclear reactors in the near future, and amend the NRC licensing and re-licensing process to require an individual Environmental Impact Statement for waste at every individual nuclear plant. 70,000 metric tons of commercial high level nuclear waste have been created thus far, with no long-term storage solution in sight. This is an unacceptable failure in safety for the public and environment. It's high time to stop adding to this waste.

Pamela Schimmelpfennig
