**Subject:** FW: Farley Unit 1 Post Accident Monitoring Report

Brandi,  
Could you add this to ADAMS and let me know the ML number. Thanks!

Ed

**Cc:** Stattel, Richard  
**Subject:** RE: Farley Unit 1 Post Accident Monitoring Report

Thanks for the information Ed.

EICB has reviewed the information provided in the 30 day report from Joseph Farley station on the Unit 1 condensate storage tank level instrument. We understand the transmitter discussed in the report has been restored to operable status and we have no questions or concerns at this point.

John,  
The link below is for a TS required report submitted by Farley, Unit No. 1, for an inoperable Condensate Storage Tank level transmitter greater than 30 days. The licensee was able to restore operability prior to submission of the report and determined that the problem was a degraded cabling splice. Please let me know if you have any questions on the issue otherwise, I'll close out NRC staff activity on the matter. Thanks.

Ed Miller
