General Comment

Why do we continue to produce this waste with ,nuclear power plants,when we haven't found a safe solution in over 50 years and probably will not ever really find a good one. .This waste will be dangerous for hundreds to thousands of years and there is no guarantee that it can be guarded properly for all those years and that there will not be an earth upheaval that will dislodge it..At least please shut down the producers of this waste so we will not create any more.
