General Comment

The American citizens, their beloved children, and land we live on, were NOT created to be utilized as a nuclear waste dump site.

To protect our health, and the health of our children, we will not accept the trafficking of radioactive waste "to or through" our homeland.

I reject NRC's waste confidence Draft Generic Environmental Impact Statement (DGEIS), and ask NRC to withdraw it for thorough revision. I have NO confidence in NRC's "waste confidence".

No industry should be allowed to continue creating wastes it has no ability to dispose of. If you have no place to dispose of radioactive spent fuel, STOP MAKING IT!

The NRC should not be allowed to issue new reactor licenses, nor grant license extensions to old operating reactors.

The cost to the American taxpayers for solar energy is one fifth that of nuclear energy.

No American state is a waste dump!
