Docket: NRC-2012-0246

Consideration of Environmental Impacts on Temporary Storage of Spent Fuel After Cessation of Reactor Operation

Comment On: NRC-2012-0246-0456

Waste Confidence - Continued Storage of Spent Nuclear Fuel; Extension of Comment Period

Document: NRC-2012-0246-DRAFT-1233

Comment on FR Doc # 2013-26726

Submitter Information

Name: Howard Brotine

General Comment

The Nuclear Regulatory Commission is on the verge of adopting a grossly inadequate plan for storing nuclear waste.

Its way past the time to begin putting PUBLIC SAFETY FIRST! For years people of the state of California and beyond have shouted against the insanity that is the NRC! Building plants on/near earthquake faults, having substandard safety regulations, and inept people in very important positions regarding PUBLIC HEALTH & SAFETY!!

It's time to rethink the entire industry and its use of nuclear materials and how where why it is properly disposed of (if there is even such a thing).. We are watching and your actions and decisions will weigh heavily on us and the future generations you impact!
