General Comment

I urge the NRC to find a better solution than THE GROSSLY INADEQUATE plan for storing nuclear waste.

Radioactive waste is dangerous, and needs to be stored properly

Fukushima is a glowing example of danger of nuclear materials. People have died, and now talking about it has been ruled to be criminal. We can only make so many STUPID moves as a human race in the future. Storing nuclear fuel in a poor manner cannot be one of these moves .Even our sailors who assisted during Fukushima meltdown are now sick - just after a few days being around the area.

Find a better storage - period.

Thank you.
