General Comment

Fukushima is poisoning the world as we speak, so I wish you would dismantle all of your nuclear plants today and make the world a safer place. We can live with blackouts while solar comes online, but we will die from cancer if we continue to use nuclear. It's just not worth the risk. Didn't your mother ever teach you not to take unnecessary risks? Come on and do the right thing for a change!!! You owe it to yourself and to your children. It's the ultimate no-brainer.
