

**Office of Administration
ADAMS Inventory of Publicly Available Documents
Cited in Rulemakings**

INSTRUCTIONS

Publicly available documents cited in *Federal Register* notices must be released to the public through the ADAMS Publicly Available Record System (PARS). Posting to the NRC's public Web site is NOT an acceptable substitute.

- COMPLETE the attached form**, listing all publicly available NRC documents mentioned in the *Federal Register* notice. Verify that each publicly available document cited in the notice is (or will be) accessible to the public in ADAMS before publication of the notice.
- INCLUDE the completed form in the publication package** sent to the Rules, Announcements, and Directives Branch for transmittal to the *Federal Register*.

NOTE: Only the Document Processing Center (DPC) can make a document accessible to the public by copying it to the ADAMS PARS Library.

A document cannot be copied to PARS unless it meets the following conditions:

1. The document must be properly profiled according to the appropriate **ADAMS Document Template**. The profile provides information the DPC needs to finalize the document as an official agency record. The profile should include information not otherwise available to DPC, such as document **Sensitivity**, **Availability**, **Release Date** and **Case/Reference** data.
2. The **Availability** field in the ADAMS profile must say "Publicly Available". This gives the DPC permission to release the document to the public.
3. The **Keyword** field in the ADAMS profile must contain the phrase "SUNSI Review Complete".
4. The **Date to be Released** field in the ADAMS profile must contain an appropriate date. This tells the DPC when to release the document to the public.
5. The **Document Sensitivity** field in the ADAMS profile must say either "Non-Sensitive" or "Non-Sensitive - Copyright". Sensitive documents cannot be released to the public.
6. The DPC group must be made an "owner" of the document in the ADAMS **Security** panel. This allows the DPC to change the document's properties. The Public User group should be made a "viewer" of the document.
7. The ADAMS pointer for the document must be copied (or dragged) to the appropriate sub-folder under the **ADAMS DPC Processing** folder in the ADAMS Document Manager. This places the document in the DPC's "IN Box" for final processing.

NOTE: Documents available in the paper copy only can be forwarded to the DPC for ADAMS entry, profiling, and final processing under cover of NRC Form 665S, "ADAMS Document Submission-Single Document" ([ML020170281](#)), or NRC Form 665P, "ADAMS Document Submission-Package or Multiple Documents" ([ML020170279](#)), as appropriate.

A properly profiled document that is moved to the ADAMS DPC Processing folder in a timely manner will be copied to the PARS library and made available to the public on the specified release date.
