West Virginia University Hospital
License No. 47-23066-02
Docket No. 03020233
Mail Control 582595

Dr. Razmianfar, in order to process the requested amendment to your license to add facilities located at the Fairmont Regional Cancer Center to your license, we need the following additional information:

1. It is unclear what use is requested for this facility. For instance, Fairmont General Hospital currently is licensed to conduct manual brachytherapy implants at the Hospital located next door to the Cancer Center requested in your amendment. Currently manual brachytherapy sources are received, stored, and implanted in areas located within the Hospital. The authorized user performing these implants maintains records of the implants and office space at the Cancer Center. Therefore, please clarify your request. For instance, are you requesting to receive, store, and implant manual brachytherapy sources in areas located only within the Cancer Center? If so, please describe: (i) areas of receipt/storage with associated shielding; and (ii) surgical implant facilities located within the Cancer Center.
2. It is unclear what other activities will be conducted in the Cancer Center requiring 3-83 radioactive material. For instance, will research be conducted in the Cancer Center and will the WVYH Radiation Safety Committee review all facilities/equipment and user training and experience for research use at this facility?

You may reply either via fax to 610-337-5269 or via email with a signed pdf. Please reply within 30 days from the date of this email or we will consider that you no longer require this request and void the action. If you have any questions, please contact me at 610-337-5169 or via email. Sincerely,

Penny Lanzisera
Senior Health Physicist
