Thousands of Success Stories

December 17, 2013

Secretary
U.S. Nuclear Regulatory Commission
Washington, DC 20555-0001
ATTN: Rulemakings and Adjudications Staff

To Whom it May Concern:

I am writing to you today to show support for PG&E's successful spent fuel management program and the NRC's Spent Fuel Storage Rule. As a sixty-six year San Luis Obispo County resident, I take great pride in knowing that PG&E is actively taking precaution to keep us safe and their site at Diablo Canyon safe for both residents and their work force for generations to come.

With NRC oversight, PG&E has a very detailed and successful spent fuel management program and continues to safely store fuel via both its wet and dry cask storage systems. I am confident that layer upon layer of safeguards are in place to effectively manage and monitor the stored spent fuel. However, the Department of Energy has a responsibility to make good on its commitment to receive and safely store the spent fuel for the long term. By doing so, locally stored spent fuel could be safely removed to a single or regional locations controlled by and protected by our national government.

Thank you for your consideration.

Sincerely,

Gilbert H. Stork, Ed. D.
Superintendent/President
