General Comment

Form ES-301-4 (a) added new Target Quantitative Attribute, "Total Events". Events is not defined within the NUREG. It also is an artificial number, since the other required attributes, i.e., total malfunctions, malfunctions after EOP entry, etc., will fulfill the requirement to have "events". Additionally, the Total Events required is listed as 8-12, and seems high based on my past experience writing NRC exams. Recommend deleting the "Total Events" from the Quantitative Attributes on Form 301-4.
