

January 16, 2014

Dr. Stefan Anton
Acting Licensing Manager
Holtec International
555 Lincoln Drive West
Marlton, NJ 08053

SUBJECT: HOLTEC INTERNATIONAL REQUEST FOR WITHHOLDING INFORMATION
FROM PUBLIC DISCLOSURE (TAC NO. L24777)

Dear Dr. Anton:

By letter dated August 21, 2013, Holtec submitted an affidavit dated August 21, 2013, executed by Debabrata Mitra-Majumdar, requesting that the information contained in the following documents be withheld from public disclosure pursuant to Title 10 of the *Code of Federal Regulations* (10 CFR), Part 2, Section 2.390:

Attachment 3 to Holtec letter 5014755, "HI-STORM 100 FSAR, Rev. 11.A, Supplement 1.III (General description of the MPC-68M) marked-up sections."

Attachment 5 to Holtec letter 5014755, "Holtec Report HI-2033074, Revision 5: HI-STORM 100S Version B Shielding Analysis; Appendix J: Maximum of TPDs Curies for Old MPC-24 with 140 lb/cuft Concrete)."

Attachment 6 to Holtec letter 5014755 "Holtec Report HI-2012787, Rev. 15: Structural Calculation Package for MPC; Supplement 54: Finite Element Analysis of MPC-68M Fuel Basket Rev. 2, and Supplement 55: Crack Propagation in MPC-68M Fuel Basket Rev.1."

Attachment 7 to Holtec letter 5014755, "Licensing Drawing # 7195, Proposed Revision 5: MPC-68M fuel basket assembly and list of changes."

The affidavit stated that the submitted information should be considered exempt from mandatory public disclosure for the following reasons:

- (a) Information that discloses a process, method, or apparatus, including supporting data and analyses, where prevention of its use by Holtec's competitors without license from Holtec International constitutes a competitive economic advantage over other companies.
- (b) Information which, if used by a competitor, would reduce his expenditure of resources or improve his competitive position in the design, manufacture, shipment, installation, assurance of quality, or licensing a similar product.

- (e) Information which discloses patentable subject matter for which it may be desirable to obtain patent protection.

We have reviewed your application and the material in accordance with the requirements of 10 CFR 2.390 and, on the basis of your statements, have determined that the submitted information sought to be withheld contains proprietary commercial information and should be withheld from public disclosure.

Therefore, the submitted information marked as proprietary will be withheld from public disclosure pursuant to 10 CFR 2.390(b)(5) and Section 103(b) of the Atomic Energy Act of 1954, as amended.

Withholding from public inspection shall not affect the right, if any, of persons properly and directly concerned to inspect the documents. If the need arises, we may send copies of this information to our consultants working in this area. We will, of course, ensure that the consultants have signed the appropriate agreements for handling proprietary information.

If the basis for withholding this information from public inspection should change in the future such that the information could then be made available for public inspection, you should promptly notify the U.S. Nuclear Regulatory Commission (NRC). You also should understand that the NRC may have cause to review this determination in the future, for example, if the scope of a Freedom of Information Act request includes your information. In all review situations, if the NRC makes a determination adverse to the above, you will be notified in advance of any public disclosure.

If you have any questions regarding this matter, I may be reached at 301-287-9250.

Sincerely,

/RA/

John M. Goshen, P. E., Project Manager
Licensing Branch
Division of Spent Fuel Storage and Transportation
Office of Nuclear Material Safety
and Safeguards

Docket No.: 72-1014

TAC No.: L24777
