Attention: Mr. A. Giambusso
Deputy Director for Reactor Projects

Subject: Docket Nos. 50-361 and 50-362
San Onofre Nuclear Generating Station
Units 2 and 3

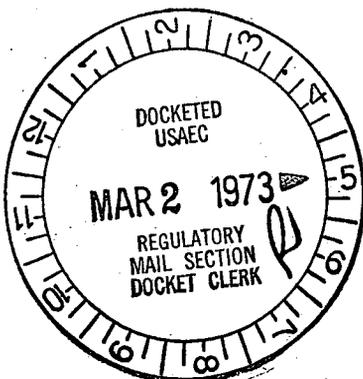

Gentlemen:

Your letter dated December 18, 1972, requested that we inform you of when we would submit an amendment containing the results of our analysis of a postulated rupture, outside containment, of piping containing high energy fluids.

In a letter dated December 28, 1972, we informed you that an evaluation was underway of the analysis and information requirements specified by your letter considering the preliminary nature of the present piping layouts on San Onofre Units 2 and 3. This evaluation was required in order to set a realistic schedule for the submittal of the requested information consistent with the orderly progression of the San Onofre Units 2 and 3 detailed design.

We have completed the above-described evaluation and the proposed schedule for submittal of information in accordance with your request of December 18, 1972, for San Onofre Units 2 and 3 is as follows:

- (a) Requested information regarding main steam and main feedwater piping system breaks outside of containment - August 1974.
- (b) Requested information regarding the balance of high energy piping system (except main steam and feedwater) breaks outside of containment - December 1976.

1441

Directorate of Licensing

-2-

February 22, 1973

If there is any change in these expected submittal dates, we will let you know as soon as possible.

Very truly yours,
