Attention: Mr. John F. O'Leary
Director

Gentlemen:

Subject: Docket Nos. 50-361 and 50-362
Application for a Construction
Permit and a Class 104(b) License
Amendment No. 17

Enclosed are three executed and 70 conformed copies of Amendment No. 17 in Docket Nos. 50-361 and 50-362, Application for a Construction Permit and a Class 104(b) License to Acquire, Possess and Use Two Utilization Facilities as Parts of Units Nos. 2 and 3 of the San Onofre Nuclear Generating Station.

This Amendment consists of the results and conclusions of additional tsunami and slope stability studies which have been recently completed and confirm the San Onofre Units Nos. 2 and 3 design. It should be noted that the seismic hypotheses described as the bases for the tsunami study were established so as to provide conservatively large tsunami results. These seismic hypotheses were not intended to be consistent with the development of the site g-value, but are conservative with respect to that development.

Very truly yours,

Enclosure
