Gentlemen:

Subject: Docket Nos. 50-361 and 50-362
Meteorological Data
San Onofre Nuclear Generating Station
Units 2 and 3

In response to the request of your staff, enclosed are the monthly and annual stability wind rose data collected from the San Onofre meteorological tower for the period of January 25, 1975 to January 29, 1976. The data include measurements from all three levels of wind sensors (prior to late October 1975, wind measurements were made at 10 meter and 120 foot elevations; subsequent to late October 1975, wind measurements were made at 10 meter, 20 meter and 40 meter elevations).

The data are submitted in the form of

- (1) Computer data cards to produce stability wind rose tables (including computer card printout and explanation of computer card format).
- (2) Wind rose tables by stability.
- (3) A data tape of hourly data listings (including explanation of tape format).

If you have any questions concerning this matter, please let me know.

Very truly yours,

Enclosures
cc: Jack B. Moore
