Gentlemen:

Subject: Docket Nos. 50-361 and 50-362  
San Onofre Nuclear Generating Station, Units 2 and 3

As part of Southern California Edison's (SCE) commitment to keep the NRC staff informed of work performed in demobilizing the dewatering well system, fifty (50) copies of "Status Report on the Investigation of Dewatering System, San Onofre Nuclear Generating Station, Units 2 and 3, April 28, 1978," (Enclosure 1) are enclosed for your use. The report summarizes work accomplished between March 24, 1978 and April 28, 1978.

On April 13, 1978, SCE and our consultants met with the Advisory Committee on Reactor Safeguards at San Onofre Nuclear Generating Station. At this meeting, SCE was requested to provide to the ACRS the volumes of loose sand in each cavity and plan/elevation drawings of structures near dewatering well cavities. The loose sand volumes are included in the Status Report as Table 1. Structure drawings are included as Enclosure 2 of this letter.

If you have any questions concerning the information presented, please contact me.

Sincerely yours,

**REGULATORY DOCKET FILE COPY**
