Julia M. (Shan) Marlette, M.S.
Radiation Safety Officer
DLP Marquette General Hospital, LLC
d/b/a Marquette General Hospital
580 West College
Marquette, MI 49855-2705

Dear Ms. Marlette:

Enclosed is Amendment No. 68 to your NRC Material License No. 21-05432-04 in accordance with your requests. Please note that the changes made to your license are printed in **bold font**.

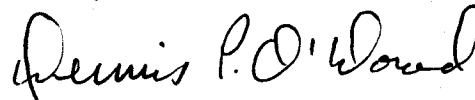

Please also note that we were not able to approve your request stated in letter dated October 18, 2013 to add Jason Funderburk, M.D. as an Authorized User (AU) for 35.1000 limited to the use of Y-90 SirSpheres, as additional information is needed. We ask that you review the training and experience requirements as described in the NRC guidance document entitled, "Microsphere Brachytherapy Sources and Devices." This document is accessible from the NRC Web site at <http://pbadupws.nrc.gov/docs/ML1217/ML12179A353.pdf>. In particular, requests for the use of Y-90 microspheres must provide documentation, as described in Section B of the guide, that the proposed AU for Y-90 microspheres has successfully completed training in the operation of the delivery system, safety procedures, and clinical use for each type of Y-90 microspheres for which authorization is sought, from either one of two pathways, as described in that section. In addition, for a proposed AU to satisfy the training requirements as described in (A)(3) of the guide, documentation must be provided as evidence that supervised work experience, as described in (A)(3)(iii), has been obtained as part of the proposed AUs training.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

In accordance with 10 Code of Federal Regulations 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

Dennis P. O'Dowd
