Mr. B. L. Ivey, Vice President  
Regulatory Affairs  
Southern Nuclear Operating Company, Inc.  
40 Inverness Center Parkway, B022  
Birmingham, AL 35242

SUBJECT: ACCEPTANCE REVIEW OF SOUTHERN NUCLEAR OPERATING COMPANY'S  
REQUEST FOR LICENSE AMENDMENT (LAR 13-030) FOR THE VOGTLE  
ELECTRIC GENERATING PLANT UNITS 3 AND 4: REVISION TO VOGTLE  
UNITS 3 AND 4 EMERGENCY PLAN TO COMPLY WITH EMERGENCY  
PREPAREDNESS RULES (TAC NO. RP9478)

Dear Mr. Ivey:

By letter dated December 20, 2013 (Agencywide Documents Access and Management System Accession No. ML13358A085), Southern Nuclear Operating Company submitted a license amendment request (LAR) for the Vogtle Electric Generating Plant (VEGP) Units 3 and 4. The proposed amendment would revise the VEGP Units 3 and 4 Emergency Plan, in accordance with Title 10 of the *Code of Federal Regulations* (10 CFR) Part 50, Appendix E, Section 1.5, to comply with the regulatory changes published in the November 23, 2011, Federal Register Notice (76 FR 72560), "Enhancements to Emergency Preparedness Regulations." Eleven topics for change were described in the published rule.

In addition, the requested amendment proposes to add a License Condition to the VEGP Units 3 and 4 Combined Licenses to require a detailed staffing analysis to be performed no later than 180 days before initial fuel load.

The purpose of this letter is to provide the results of the U.S. Nuclear Regulatory Commission (NRC) staff's acceptance review of this LAR. The acceptance review was performed to determine if there is sufficient technical information in scope and depth to allow the NRC staff to complete its detailed technical review. The acceptance review is also intended to identify whether the application has any readily apparent information insufficiencies in its characterization of the regulatory requirements or the licensing basis of the plant.

Consistent with Section 50.90 of Title 10 of the *Code of Federal Regulations* (10 CFR), an amendment to the license must fully describe the changes requested, and following as far as applicable, the form prescribed for original applications. Section 52.79 of the 10 CFR addresses content of technical information required. This section stipulates that the submittal address the design and operating characteristics, unusual or novel design features, and principal safety considerations.

B. L. Ivey

- 2 -

The NRC staff has reviewed your application and concluded that it does provide technical information in sufficient detail to enable the NRC staff to complete its detailed technical review and make an independent assessment regarding the acceptability of the proposed amendment in terms of regulatory requirements and the protection of public health and safety and the environment.

Given the lesser scope and depth of the acceptance review as compared to the detailed technical review, there may be instances in which issues that impact the NRC staff's ability to complete the detailed technical review are identified despite completion of an adequate acceptance review. You will be advised of any further information needed to support the NRC staff's detailed technical review by separate correspondence.

If you have any questions, please contact me at (301) 415-1439 or [David.Jaffe@nrc.gov](mailto:David.Jaffe@nrc.gov).

Sincerely,

***/RA Denise McGovern for:/***
