SUBJECT: ST LUCIE PLANT — NRC TEMPORARY INSTRUCTION 2201/004,  
“INSPECTION OF IMPLEMENTATION OF INTERIM CYBER SECURITY  
MILESTONES 1–7” INSPECTION REPORT NO. 05000335/2013404 AND  
05000389/2013404

Dear Mr. Nazar:

On December 13, 2013, the U.S. Nuclear Regulatory Commission (NRC) completed the onsite activities associated with the inspection at your St Lucie Plant, Units 1 and 2. The enclosed report documents the results of this inspection, which were discussed on December 13, 2013, with you and other members of your staff.

The inspection examined activities conducted under your license as they relate to safety and compliance with the commission’s rules and regulations and with the conditions of your license related to the implementation of interim cyber security milestones. The inspection was conducted in accordance with NRC Temporary Instruction (TI) 2201/004, “Inspection of Implementation of Interim Cyber Security Milestones 1–7” issued January 3, 2013.

Three findings of very low safety significance (Green) which were determined to involve violations of NRC requirements were identified during this inspection. Further, one licensee-identified violation, of very low safety significance (Green) is listed in this report. However, in accordance with the Security Issue Forum (SIF) Charter, the NRC can exercise enforcement discretion during inspection of the interim cyber security measures for licensees who demonstrate a “good faith” interpretation and attempt to implement Milestones 1-7. This discretion applies to licensees who have tried to implement the new requirements, but failed to be in full compliance. Before discretion is considered or granted for any issue, licensees must accept the finding, place the finding into their Corrective Actions Program (CAP), and take appropriate corrective action to restore compliance in a timely manner.

The issues above were discussed at the SIF meeting on January 8, 2014. Based upon the meeting, the NRC is not pursuing enforcement action due to your “good-faith” attempt to interpret and implement Interim Cyber Security Milestones 1 – 7 commitments and because of

your prompt corrective actions to enter these issues into your CAP. Upon completion of all corrective actions, you are requested to provide written notification to the NRC's regional office as to the method and date of closure for the identified issue(s).

If you contest the violations or significance of the findings discussed in the report, you should provide a response within 30 days of the date of this inspection report, with the basis for your denial, to the Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington DC 20555-0001; with copies to the Regional Administrator, Region II; the Director, Office of Enforcement, United States Nuclear Regulatory Commission, Washington, DC 20555-0001; and the NRC Resident Inspector at St Lucie Plant.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of the NRC's Agencywide Documents Access and Management System (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

However, the material enclosed herewith contains Security-Related Information in accordance with 10 CFR 2.390(d)(1) and its disclosure to unauthorized individuals could present a security vulnerability. Therefore, the material in the enclosure will not be made available electronically for public inspection in the NRC Public Document Room or from the PARS component of NRC's ADAMS.
