SUBJECT: SUMMARY OF THE JANUARY 9, 2014, CATEGORY 2 MEETING
REGARDING THE NATIONAL FIRE PROTECTION ASSOCIATION
STANDARD 805 FREQUENTLY ASKED QUESTION PROCESS

On January 9, 2014, the U.S. Nuclear Regulatory Commission (NRC) staff held a meeting with stakeholders and the public to discuss Frequently Asked Questions (FAQs) at plants that are adopting National Fire Protection Association Standard 805 (NFPA 805).

Industry stakeholders and the NRC staff discussed the list of currently open FAQs. Industry representatives informed the staff that FAQ 13-0068, which deals with the NFPA 805 license condition, was being withdrawn. Participants agreed that the meeting summary would document the withdrawal of the FAQ.

NRC staff stated that the latest comments on FAQ 13-0069, which deals with fire brigade qualifications, were provided to include language that was originally in the FAQ but that appeared to have been removed after one of the various revisions. Industry stakeholders stated that the comments had been received, and would be incorporated in the next revision since there were no general objections.

The NRC staff stated that they were working with industry representative to schedule a separate face-to-face meeting to discuss issues related to open FAQ 12-0061, which deals with the plant change process. The meeting is being planned for February 2014.

There were no new FAQs introduced or discussed at the meeting. There were no public comments provided during the meeting.

The NRC staff and stakeholders agreed that the next FAQ meeting would take place via teleconference, at a date to be determined.

The meeting handouts are available in the Agencywide Documents Access and Management System. NRC staff comments on FAQ 13-0068, Revision 4 is available at ML13357A207. The NRC NFPA 805 FAQ status and history document is available at ML14023A871.
