Attn: Document Control Desk

Subject: Request for Extension of Uranium Receipt Measurement Reporting

References: 1) NRC License SNM-1097, Docket 70-1113  
2) GNF-A Fundamental Nuclear Material Control Plan (FNMCP)

Dear Sir or Madam:

With reference to activities authorized by NRC License SNM-1097 at Global Nuclear Fuel – Americas, LLC (GNF-A) facility in Wilmington, NC, GNF-A requests a one-time measurement reporting extension for a shipment of special nuclear material.

The GNF-A FNMCP adopts the industry standard receipt measurement timeframe pursuant to NUREG/BR-0006 "Instructions for Completing Nuclear Material Transaction Reports". Timely used in this context is defined by NUREG/BR-0006 as within 60 days of receipt.

Due to year-end holidays and recent inclement weather, a onetime extension of reporting these measurements for a shipment of UO2 powder received on December 11, 2013 is requested for an additional 45 days.

Pursuant to 10 CFR2.390 and NRC RIS 2005-31, GNF-A requests the attachment to this letter be withheld from public disclosure because it contains security related information regarding licensed quantities of special nuclear material.

If you have any questions regarding this matter, please contact me at (910) 819-5950.

Sincerely,

  
Scott Murray, Manager  
Facility Licensing
