Attachments: delvcl-334614-3146781.pdf

Mark and Kathy,

I just received the lab results for our FSS samples. The samples we split with you would be from Survey Units (SU) 1.3 (reactor pool concrete floor) and 1.6 (soil). Our SU1.3 #1 sample would correspond to your SU 1.3 #2 side-by-side sample, and our SU 1.3 #3 sample would correspond to your side-by-side SU 1.3 #4 sample.

The concrete core sample results given in the GEL report are for the 0-15 cm interval. Now that I have the results for this top interval, I will be selecting some additional concrete samples for analysis from the 15 -30 interval to demonstrate a decreasing trend with depth.

Please find attached the results for the sample(s) received on October 03, 2013. Please let us know if you have any questions.

Thanks,
Erin Trent
