RE: Amendment Radioactive Materials License No. 06-05869-01/*1030-03790*

To Whom It May Concern:

We are writing to request an amendment to Radioactive Materials License No. 06-05869-01. Specifically, we request that Section 6.S of the license, allowing for the possession of Ni-63 plated foils, be removed.

Pfizer no longer possesses any Ni-63 plated foils under the specific license. We currently have two (2) Ni-63 sealed sources on site. These sources are both contained within Agilent Model G2397A electron capture detector cells. We possess these sealed sources under a general license as allowed for in 10 CFR 31.5. Agilent is licensed to distribute these sources to general licensees under NRC Materials License Number 07-28762-02G.

If you have any questions or concerns about this request, please do not hesitate to contact us.

Sincerely,

Eric Watters  
EHS Site Lead

David J. Durkee  
Radiation Safety Officer
